

Marie Shvaker

marie.shvaker@gmail.com — www.linkedin.com/in/marieshvaker

RESEARCH INTERESTS

Researching at the intersection of **human-computer interaction**, **social-computing**, **fairness**, **trust**, and **software engineering**.

EDUCATION

University of Massachusetts, Amherst

Master of Science in Computer Science

Amherst, MA

Jan. 2026 — Dec. 2026

- Cumulative GPA: 3.97/4.00

Bachelor of Science in Computer Science

Sept. 2022 — Dec. 2025

- Secondary Major: Mathematical Computing
- Cumulative GPA: 3.83/4.00

PEER-REVIEWED PUBLICATIONS

- [1] A. Gaba, Z. Kaufman, J. Chueng, **M. Shvaker**, K. Wm. Hall, Y. Brun, and C. Xiong Bearfield, “My Model is Unfair, Do People Even Care? Visual Design Affects Trust and Perceived Bias in Machine Learning”, in *2023 IEEE Transactions on Visualization and Computer Graphics*, full paper, 25% acceptance rate, Jan. 2024. DOI: 10.1109/TVCG.2023.3327192, arXiv: abs/2308.03299.

PAPERS IN SUBMISSION

- [1] **M. Shvaker** (co-first author), Z. Kaufman (co-first author), A. Martin, M. Endres, and Y. Brun, “Trust Testing: Testing How Software Features Affect User Trust”
- [2] K. Newman, **M. Shvaker**, Y. Brun, A. Begel, and C. Le Goues, “Patch Suggestions Change How Developers Debug”

RESEARCH EXPERIENCE

Carnegie Mellon University

Computer Science Research Assistant

Remote

Sept. 2025 — Present

- Assisting in eye-tracking study on how developers debug and incorporate bug patches (under Dr. Claire Le Goues and Dr. Yuriy Brun)
- Working on data analysis and cleaning, qualitative coding, designing diagrams, paper writing:
 - Wrote scripts to map gaze points to areas of interest on screen
 - Built models depicting the debugging process using qualitatively analyzed participant interviews

University of Massachusetts, Amherst

Computer Science Research Assistant

Amherst, MA

Sept. 2022 — Present

- Studied human-AI trust, fairness, visual design, and reasoning strategies under Dr. Yuriy Brun
- Resulted in an IEEE TVCG '23 paper and a co-first-author paper (now under submission at a top conference)
- Developed a codebook for survey responses and applied it to 2,000+ entries for final statistical analysis
- Designed framework for trust testing software systems
- Developed and deployed instrument to measure effects of software features on trust through behavioral experiments
- Developed 11 trust game iterations and administered four Prolific surveys to over 450 participants to assess user trust
- Analyzed survey data with R, finding a statistically significant link between chatbot tone and trust

TEACHING & MENTORSHIP EXPERIENCE

Private Math Tutor

August 2020 — Present

- Tutored 15+ K-12 students in math for coursework review and exam preparation throughout 2- to 3-year school cycles
- Provided summer course advancement by creating practice worksheets and mock exams

AWARDS

Bay State Scholar

Jan. 2026 — Dec. 2026

- \$6,882 per academic semester
- Awarded to top computer science seniors in the Five College Consortium entering the M.S. in computer science program

UMass Amherst Chancellor's Award

Sept. 2022 — Dec. 2025

- \$16,000 per academic year
- Awarded to first-year out-of-state students with strong academic and personal achievements

SKILLS

- **Programming Languages:** Java, Python, R, SQL, C, Typescript, Javascript
- **Research and Developer Tools:** Tableau, Qualtrics, VMware Fusion Pro, Wireshark
- **Spoken Languages:** English (native), Russian (fluent), French (beginner)
